

Writing Test Cases II

[Submit Assignment](#)

Due Sunday by 11:59pm **Points** 100 **Submitting** a file upload **File Types** pdf
Available Jan 23 at 12am - May 23 at 11:59pm 4 months

Now that we have looked at various testing techniques, let's see how many of these can be applied to that simple program we started off with - the triangle problem.

One way to complete this assignment is - Select a few test cases from the previous triangle problem assignment and identify if you have used any technique (Control Flow, Data Flow, Conformance, Boundary Value, Equivalence Class, Domain Testing etc) in creating and using these test cases.

Keep it simple, please.

Some Rubric (2)

Criteria	Ratings			Pts
Testing Techniques <i>At least three different techniques identified. Techniques are clearly related to the test case creation and use.</i>	80.0 pts Excellent	40.0 pts Average	0.0 pts Poor/Late	80.0 pts
Presentation <i>Easy to understand. Followed instructions.</i>	20.0 pts Excellent	10.0 pts Average	0.0 pts Poor/Late	20.0 pts
Total Points: 100.0
